Year-to-date FY 2011 total net receipts (excluding transfers) increased \$36.3 million (2.0%) compared to FY 2010. The year-to-date revenue change is significantly impacted by the racing and gaming receipt deposit timing issue discussed in the Other Receipts section below. Without this issue, net receipts would show an increase of approximately 5.7% year-to-date. Major sources and their contribution to the FY 2011 change include:

- Personal income tax (positive \$56.8 million, 6.2%)
- Sales/use tax (positive \$24.7 million, 3.5%)
- Corporate tax (positive \$8.0 million, 8.2%)
- Other taxes (positive \$5.9 million, 3.7%)

- Other receipts (negative \$77.0 million, - 48.6%)
- Tax refunds not including school infrastructure refunds (positive \$22.5 million)

Status of the Economy

Iowa nonfarm employment was reported at 1,479,800 for the month of September (not seasonally adjusted), 3,300 higher (0.2%) than September 2009.

Iowa's 12-month average employment is presented in a graph below. Iowa's average non-farm employment peaked in October 2008 at 1,526,400, 47,700 above the peak prior to the previous recession (January 2001). The current 12-month average reading is now 1,471,100, resulting in annual average Iowa nonfarm employment 55,300 below the October 2008 peak and 7,600 below the January 2001 peak. This situation is not unique to Iowa, as current U.S. nonfarm employment is also below the peak experienced prior to the 2001 U.S. recession.

The employment chart also presents Iowa nonfarm employment as a percent of U.S. nonfarm employment. Iowa's share of U.S. nonfarm employment decreased noticeably from 1999 through 2002. The decline continued at a much slower pace from 2002 through 2007. Iowa's share of U.S. nonfarm employment has been improving since the start of the recession in December 2007; however, the improvement has moderated considerably in recent months.

The Consumer Price Index (CPI-U) through September 2010 was 218.4 (1983/84=100). Consumer prices increased 0.1% in September (not seasonally adjusted) and the annual rate of inflation now stands at 1.1%. The annual rate of inflation peaked at 5.6% in July 2008 and decreased rapidly in the following months.

Core CPI, an inflation measure excluding food and energy expenditures, was 0.2% in September and totals 0.8%, year-over-year. The core inflation rate declined considerably from the early 1990s through January 2004 when the rate bottomed at 1.1%. The core inflation rate accelerated from that point, with most readings between 2.0% and 3.0%. With the onset of the recent recession, the annual core inflation rate has declined and has now been below 2.0% for twenty-two consecutive months. For the two components excluded from the core rate, energy prices are up 3.8% year-over-year while food prices are up 1.4%.
